PROJECTS

PDF-ChatGPT | PDF Question Answering System | *React.js, Python, FastAPI*

- Developing a web application that lets users upload PDF documents & ask questions about their contents.
- Building a React.js interface for PDF upload, question entry, and displaying relevant answers.
- Using Python FastAPI to expose backend endpoints for document processing and question-answering workflows.

SigmaGPT | AI Chatbot | *MERN Stack*

- Developed an AI chatbot application with a React.js frontend and Node.js/Express.js backend.
- Integrated REST APIs for communication between frontend and backend.
- Implemented a responsive user interface and used MongoDB to manage application data.

Version Control System | *MERN Stack*

- Built a Git-inspired version management platform with authentication features.
- Designed REST APIs for repository and user management.
- Implemented MongoDB-based data storage and a React.js user interface.

Yoga Recommendation & Monitoring System | *ASP.NET, C#, SQL Server*

- Developed a web-based yoga recommendation system with user registration, goal tracking, and progress monitoring.
- Designed database tables and implemented CRUD operations using SQL Server.

- Created modules for feedback and personalized recommendations.
